

Delivered By Jeremy DalleTezze

SVP, Software Development and Analytics,
TSIA

Bio

Jeremy DalleTezze, Ph.D., is the senior vice president of software development and analytics for TSIA. In this role, he works with members to identify and study the emerging trends in consumption analytics through surveys, case studies, webinars, presentations, and member inquiries. He also is the head of TSIA's internal analytics team, known as "the A-Team", which provides analytics support for TSIA, including the research team, by analyzing their benchmark and survey data.

Jeremy earned his PhD in international economics and finance from Brandeis University. He has extensive experience working with corporations of all sizes on topics including forecasting, retail chain optimization, web analytics, text mining, and consumption analytics.
